

Product Overview:

Wireless bluetooth transmission

No need a receiver or install any drivers

The built-in intelligent bluetooth decoding function does not require a receiver to connect seamlessly with the phone, IPAD, laptop (with bluetooth module).

The BCX-95 is a versatile and compact pocket scanner that can read all types of 1D and 2D codes. Built-in Bluetooth connectivity allows the device to be used up to 30 meters away while still relaying information, and it can be easily paired to mobile phones and tablets for added convenience. If the device does drop out of range, it will continue to store codes in its built-in memory and will sync any data when back in range, so operators never have to worry about straying too far.

The BCX-95 also comes with a handy dongle allowing users to connect it quickly to any PC or laptop. As well being compact and dependable, it's also incredibly durable and resilient with a tried and tested 1.5 meter drop resistance. If your clients need a scanner that can easily fit into a pocket, withstand knocks and drops, and deliver fast and accurate scanning, the BCX-95 is an ideal companion.

Reasons to buy:

- * 2D Barcode pocket scanner
- * Bluetooth connection up to 30m (open space)
- * Takes 1.5m drop making it an ideal daily companion scanner
- * Can be paired to mobile phones, tablets plus a dongle for PC connection
- * Stores codes when out of range

BCX-95

2D Wireless Pocket Scanner

Key Features:

Go anywhere scanning

The BCX-95 is a hand pocket scanner that can be taken anywhere with you. With easy connection via Bluetooth to PC's, laptops, phones and tablets, it can also store up to 50,000 reads when out of range to download when you are ready. It is an ideal companion for users on the move.

Durable design

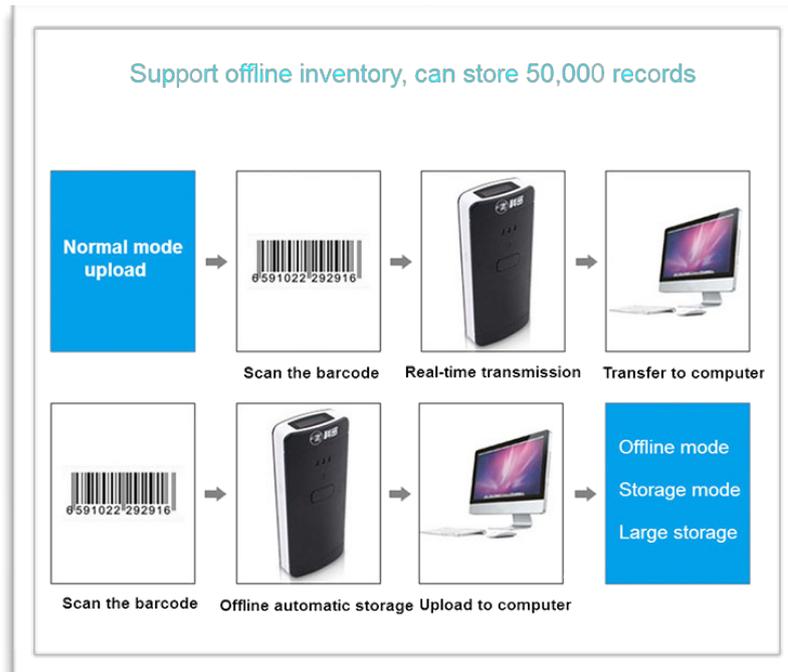

The BCX-95 has been built to withstand daily knocks and bumps that come with accompanying its user during the working day, capable of withstanding 1.5m drops and sealed to IP54 rating.

Superior performance

Capable of reading all types of 1D and 2D codes, the BCX-95 offers fast and efficient scanning, with a range of up to 30m from its host. It is an ideal choice for any application where freedom of movement is a must.

Intelligent Bluetooth

The built-in intelligent bluetooth decoding function does not require a receiver to connect seamlessly with PC, laptops, phones and tablets.

Ideal for...

Retail - Warehouse - Electronic tickets - Ordering systems
