

Product Overview:

When it comes to desktop scanning for kiosks, bars and cafes, the BCX-F10 is extremely capable and dependable. Able to read all 1D and 2D codes, the scan engine is ideally suited to scan from mobile phone screens as well as ticket stubs and loyalty cards. The BCX-F10 is also extremely user-friendly, making it perfect for applications such as airport check-in desks where allowing customers to self-serve can save time and reduce queue sizes.

If your client runs a cafe or bar, QR codes for various promotions can be read instantly, and the plug and play compatibility of the BCX-F10 makes for an extremely easy setup process. The BCX-F10 can be attached to any existing terminal via USB to get your client and their team up and running in no time.

Reasons to buy:

- * Desktop 2D mobile phone scanner, ideal for clubs and bars to read loyalty codes.
- * Self induction scanning, easy for customer to use. Ideal for airport check-in desks.
- * Easily reads QR codes for promotions in retail/cafes.
- * Plug and play USB connection.

QR code, mobile phone screen and computer screen barcode (support mobile payment)

BCX-F10

2D Mobile Phone Scanner

Key Features:

Easy self-service

With its versatile presentation mode, the BCX-F10 lets customers take control and scan barcodes from their mobile phones with ease.

Scan in all lighting conditions

From paper to screen, the BCX-F10 is smart enough to switch on its own background lighting to ensure the perfect light conditions for a quick and easy read.

Your own custom branding

Personalise the BCX-F10 to represent your clients' brand or an exclusive event they are attending. Alternatively, you can use the space to add user instructions for newer members of staff.

East to install

The BCX-F10 is a USB plug and play device, so it can be moved from one PC to another with ease. This is especially useful for events or access applications.

Ideal for...

Loyalty/reward schemes - Ticketing - Coupon reading - Payment - Access control
