

### Product Overview:

The FM30 is the perfect solution for kiosks or point-of-sale where fast, frequent and accurate scanning is paramount. The built-in scan engine can easily read both 1D and 2D codes, and the FM30 has also been specifically designed to read mobile phone screens seamlessly. That makes it an easy recommendation for businesses that need to scan loyalty codes or on-screen tickets and want to avoid queues of customers.

Easy to install and fit right out of the box, the FM30 can easily be mounted on any surface from above or below and is available in bezel mount (FM3051) or flush glass mount face (FM3056) depending on the application.

### Reasons to buy:

- \* Ideal for kiosk and POS solutions for loyalty codes or paper and mobiles.
- \* Available in bezel mount (FM3051) or flush glass mount face (FM3056).
- \* Specifically designed for reading from mobile phone screens.
- \* Easy fit into a surface cut out mounted from above or below.
- \* Scans all 1D and 2D codes at high speed.
- \* Easy to install and set up using barcodes.

# FM30 Grouper II

## Fixed Mount Barcode Scanner

### Key Features:

#### Effortless scanning

The FM30 is designed to read 1D and 2D barcodes flawlessly from LCD screens. It makes scanning from mobile devices easier than ever, so its ideal for kiosks and ticket booths. What's more, it's compact and incredibly easy to mount in small spaces.

#### Fast and efficient

When a steady flow of 1D and 2D barcodes is presented, the FM30 will read them with ease. The built in scanning engine is capable of reading multiple barcodes in quick succession with remarkable accuracy.

#### Compact and mountable

Perfect for small kiosks and ticket booths, the FM30 is extremely easy to mount in small, enclosed spaces. Add in plug and play simplicity, and this fixed mounted scanner is a quick and seamless addition to any business.

#### Low light scanning

Thanks to built in infrared technology, the FM30 can make short work of scanning hard to see barcodes in low light conditions. Users will also be able to scan from mobile phone screens with low brightness settings without having to worry about repeated attempts.

#### Ideal for...

POS solutions - Kiosk integration - Mobile phone screen scanning applications - Loyalty programs - Ticket validation
