

### Product Overview:

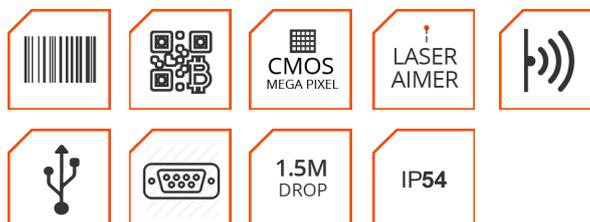

When it comes to fixed mount scanning in kiosks and other customer-intensive environments, the FM430 Barracuda truly delivers. A high quality megapixel camera allows for super fast reading of 1D and 2D codes, and a built-in laser aimer considerably increases operator accuracy.

Combined with the IR sensor which helps to detect barcodes in low light levels, the Barracuda is the perfect solution for hospitality or retail applications where light levels are inconsistent. The device is plug and play compatible and ready to go out of the box, and can be easily mounted to any production line with the fixtures provided.

### Reasons to buy:

- \* High Quality mega pixel camera for high speed reading.
- \* Easy to mount with fixing holes in the housing.
- \* Supports all 1D and 2D codes with laser aimer for ease of use.
- \* Using white light to ensure codes are well lit, especially mobile phones.
- \* Combines IR sensor for detection of code presentation in low light levels.

# FM430 Barracuda

## Fixed Mount 2D Barcode Scanner

### Key Features:

#### For accurate low light scanning

The FM430 Barracuda is one of the most advanced fixed mounted scanners available today. Using a combination of infrared and white light sensors, it's able to make accurate reads from 1D and 2D barcodes even in low light conditions. The Barracuda even emits its own light in particularly dark areas, allowing for near perfect scanning even at short distances.

#### Ideal for outdoor use

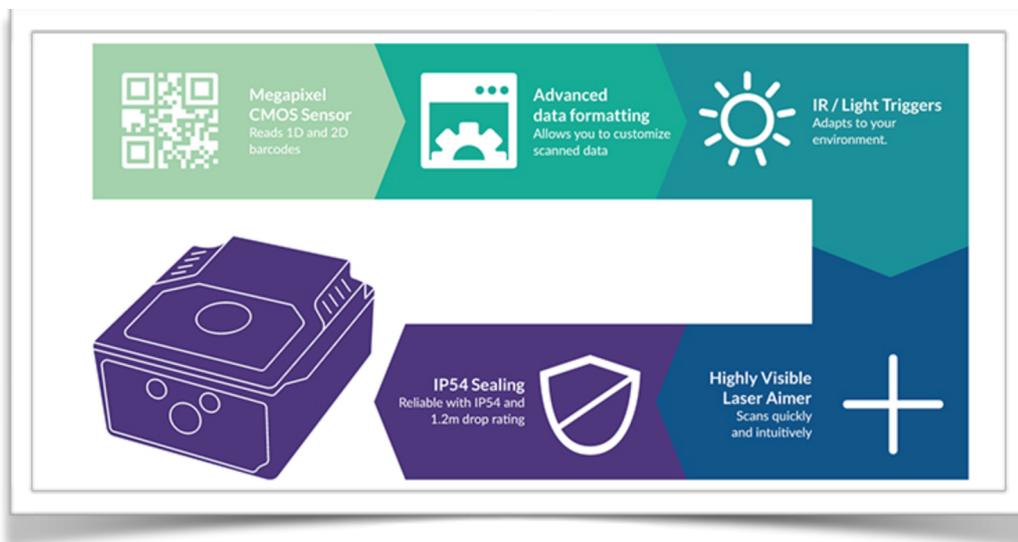

The Barracuda is IP54 rated, allowing it to be used outdoors with full protection from dust and moisture. Ideal for outdoor applications where regular scanning of products and data collection is necessary.

#### Laser aimer

For inexperienced users, or those wishing to work quickly and accurately at a distance, the Barracuda is fitted with a bright laser to aid targeting. This vastly improves accuracy and therefore efficiency, allowing for less downtime and increased productivity.

#### High definition camera

No matter the size or quality of the barcodes presented, the Barracuda will read it quickly and seamlessly thanks to its onboard megapixel camera. It also makes reading barcodes from low light mobile phone screens a breeze.

#### Ideal for...

Self Service Kiosks used in e-commerce - Express Delivery Services - Access Control - Loyalty - Mobile Payment - Events Ticket Redemption - Gaming Cash outs - Postal Services - Transport Boarding Passes - Parking Ticket Machines - Production Line
