

Product Overview:

The FR20 from Newland is a fast and dependable fixed mount scanner that can be sat on any countertop or work surface. The device has been designed and optimised to perform well in bars and ticketing stations, and the built-in scan engine can read codes from phone and tablet screens with ease; perfect for quickly scanning tickets or loyalty codes at point of sale.

The FR20 is extremely easy to fit, and totally plug and play compatible via USB, so everything is ready to go right out of the box.

Reasons to buy:

- * A counter top scanner for reading barcodes from mobile phone screens.
- * Ideal for loyalty codes at bars or mobile ticketing stations.
- * Totally plug and play USB.
- * The optics and light conditions have been tuned specifically for the application.

FR20

Fixed Mount Barcode Scanner

Key Features:

Outstanding scanning performance

The FR20 can be easily placed on any desktop work area for fast, reliable scanning. Ideal for loyalty or ticket entry where frequent, reliable scanning is required. As well as standard 1D barcodes, the FR20 can also read Data Matrix and QR codes with ease. A larger scanning window also allows for increased accuracy when scanning from smartphone or tablet screens.

Compact and easy to install

The FR20 is designed to fit seamlessly to any desktop surface, allowing operators to get set up and begin scanning within minutes. This simplicity is echoed in the way the FR20 scans, requiring very little effort from the operator as barcodes repeatedly pass through.

Superior screen decoding

A larger-than-usual scanning window makes the FR20 the perfect choice for ticketing machines and busy club bars, allowing the device to read barcodes easily as they are presented. What's more, the device has been designed specifically with LCD screens in mind, making it ideal to read 1D and QR codes from other devices.

Easily programmable

The FR20 is ready to go right out of the box and is USB plug and play compatible, but businesses with particular needs will be able to further configure the device. Detailed and easy-to-read instructions are provided in a simple programming guide.

Ideal for...

Electronic tickets/coupons - Mobile marketing - Event entry - Clubs/bar loyalty - Office automation
