

Product Overview:

The HR11+ Aringa is an excellent all rounder when it comes to 1D scanning in the modern workplace. It offers the features and performance of some high end scanners without the excessive price tag, making it a good general purpose scanner for growing businesses. A 2500 pixel imager allows for easy scanning of high density codes, including those found on tablets or smartphone screens.

Coupled with the fast decoder, the Aringa provides a swift and reliable scanning experience. It's extremely comfortable to hold, and an adaptable hands free stand also makes it ideal for stationary EPOS scanning. A tough outer shell also means it's protected against accidental drops of up to 1.5 meters; perfect for a busy workplace where lots of frequent scanning is required.

Reasons to buy:

- * 2500 pixel imager also allows high density code reading.
- * Easy reading from phone screens.
- * An adaptable hands free stand makes it ideal for EPOS.
- * A tough housing that can withstand 1.5m accidental drops.
- * Well proven performance offers excellent value for money.
- * A fast chip decoder gives a quick and crisp read experience.

HR11+ Aringa

1D Coded Handheld Scanner

Key Features:

Outstanding performance

The HR 11+ Aringa blends ergonomics and aesthetics in one of their most impressive 1D scanners yet. The Aringa offers exceptional value for its price tag, offering a 2500 pixel linear imager with a user experience more akin to the expensive end of the market.

Ergonomic and lightweight

Not only does the Aringa look the part, but its lightweight and ergonomic design help to reduce operator fatigue on long, scan-intensive shifts.

Scanning from paper and screens

The Aringa is equipped with Newland's latest decoding technology, allowing it to rapidly scan 1D barcodes on both paper and screens. For emerging applications like O2O, the fast and effective scanning offered by the Aringa can prove an invaluable addition to any business.

With optional foldable smart stand

Complete with a foldable smart stand, the Aringa allows users to switch seamlessly between handheld and hands-free scanning.

Ideal for...

Retail/convenience store - O2O - Pharmacy & cosmetics stores - Grocery stores - Tobacco kiosks - Ticketing booths
