

Product Overview:

The HR1250 Anchoa from Newland is an ideal entry level scanner that boasts some powerful features at a surprisingly affordable price. The corded 1D scanner works perfectly well as a counter top barcode reader, but can also be easily connected to laptops and tablets, making it the ideal choice for workers out in the field. What's more, the HR1250 uses very little power and has been designed with sustainability and eco-friendliness in mind.

As well as helping businesses reduce their carbon footprint, it has the added bonus of being cheaper to run than most scanners on the market. If you're looking for a fast, dependable 1D corded scanner at an entry level price point, look no further than the HR1250 Anchoa.

Reasons to buy:

- * Eco friendly low power consumption scanner (just 55mA±5mA).
- * Small, lightweight housing that's easy to carry around.
- * Ideal for field workers connected to laptops and tablets.
- * A high Quality entry level scanner that is competitively priced.

HR1250 Anchoa

1D Corded Handheld Scanner

Key Features:

Eco Friendly Scanning

Fast and dependable with low power consumption, The HR1250 Anchoa confirms Newland's commitment to design eco friendly products without compromising on performance. The Anchoa operates on a 55mA±5mA current only, allowing businesses to keep their overheads down whilst also considering the environment.

Superior scanning performance

The HR1250 Anchoa offers reliable and dependable scanning with a read rate of up to 300 scans per second. This improves accuracy, and as a result can enhance productivity and profitability.

Ergonomic, lightweight design

The Anchoa has a lot going for it, not least its streamlined, ergonomic design. Operator fatigue will become far less likely thanks to the contoured grip, allowing the device to fit comfortably in the user's hands. For scan-intensive operations or high intensity shifts, the Anchoa is an ideal choice.

Highly cost effective

Not only is the Anchoa eco-friendly and able to run with lower overheads, it's also extremely competitively priced for the features on offer, giving users excellent value for money.
