

Product Overview:

The MT90 Orca is a state of the art touch screen terminal that's packed with features. Small and lightweight, it's incredibly comfortable to use and its rugged exterior can withstand accidental drops of up to 1.5 meters. A high speed megapixel camera makes reading codes fast and precise, and connectivity options including Wi-Fi, 4G and Bluetooth make data transfer seamless.

The MT90 comes complete with 'Buckets' MDM software, allowing remote control of the unit when it's out in the field. Factor in the 5" full colour screen, and the Orca is one of the best Android mobile computers on the market today.

Reasons to buy:

- * A state of the art touch screen terminal packed with features to be able to tackle all todays workplace tasks.
- * Elegant but rugged with a small and lightweight design.
- * 5 inch full colour screen, easy to view.

- * High speed mega pixel scan engine for precise reading reliability.
- * Capable of withstanding 1.5m drops and sealed to IP65 standard.
- * Supplied with free 'Buckets' MDM software to allow remote control of units in the field.

MT90 Orca

Android Mobile Computer

Key Features:

2D mega pixel scan engine

The Orca comes armed with Newland's fifth generation imaging technology 2D megapixel barcode reader, providing flawless performance day after day. Offering high resolution that means even small or slightly damaged barcodes can be read from a distance, making scanning more efficient while reducing downtime.

Buckets of potential

All Orca models come equipped with 'Buckets' - Newland's mobile management software. Buckets allows one administrator to control all devices in the field, so pushing updates and making changes in real-time is child's play.

Durable and rugged

The MT90 Orca can take a hit, with IP65 standard sealing offering protection from dust, dirt and water. Thanks to its rugged housing, the Beluga has been tested with a drop resistance of up to 1.5m without damage.

Android 7.0 Nougat

The Orca has almost endless application possibilities thanks to its Android 7.0 Nougat operating system. Security comes as standard, along with all the admin tools users might need for ultimate control and peace of mind.

Ideal for...

Tracking location and details of maintenance work - Direct delivery - Ticket redemption - Mobile sales - Retail applications - Logistics - Transport - Manufacturing - Healthcare
