

Product Overview:

This entry level commercial smartphone/terminal with a 5 inch display is ideal to act as a communication centre, taking phone calls, emails and texts plus has the ability to run command apps, perfect for stocktaking, replenishment or simply managing data on the move.

Powered by Android, the N5000 PDA smartphone is fully compatible with a wide range of industrial and commercial apps, and is designed specifically for frequent, everyday use. A dedicated 2D scan engine allows for quick and seamless scanning, while a built in laser aimer greatly improves operator accuracy and speeds up the data gathering process.

Reasons to buy:

- * Entry level smartphone/terminal with a 5 inch display.
- * A daily smart phone that can perform industrial/commercial apps with ease.
- * A dedicated built in 2D barcode reader with laser aimer.
- * The tough housing is sealed to IP54 level and withstands 1.5m drops.
- * Stocktaking, replenishment or just managing data on the move.

N5000

Hybrid Android Smartphone/PDA

Key Features:

Sharp, vivid display

The Smartphone N5000 comes with a rich 5.0" high definition display for an exceptional user experience. Able to display full colour, the screen looks sharp and vivid in broad daylight as well as in darker conditions.

Night time mode

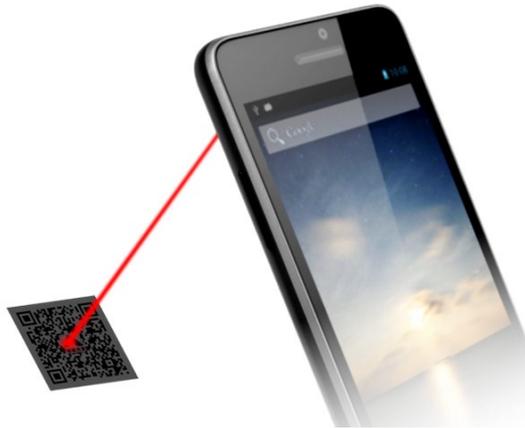

Not only does the N5000 illuminate to make scanning easier in darker conditions, it also has the ability to automatically adjust the level of illumination based on how bright the environment is.

Works come rain or shine

Whatever the weather, users can depend on the N5000 to get the job done. Moist hands, and even gloved fingers, can control the device flawlessly without any loss of control. Ideal for adverse weather or moist indoor conditions.

High speed scanning technology

The N5000 makes light work of 1D and 2D scanning thanks to Newlands patented scan engine. Laser aiming further enhances the user experience, allowing for effective scanning at remarkably high speeds.

Ideal for...

Inventory counting - Access control - Back office inventory management - Hospitality - Restaurants - Stock management - Food traceability
