

Product Overview:

The NQire 1000-II from Newland is one of the fastest and most reliable micro kiosk scanners available today. Running on Android 7.0, the Manta has a snappy touchscreen interface capable of running multiple applications at any given time, and the device can be easily mounted on a wall or countertop.

The powerful built-in scan engine is capable of reading both 1D and 2D codes seamlessly, and a 5 megapixel front facing camera comes as standard in preparation for future facial recognition apps. An optional RFID reader can be included to broaden the Manta's capability even further, making it ideal for access control applications where presenting and scanning codes isn't always convenient or viable.

Reasons to buy:

- * A wall or counter top mounted touch screen micro kiosk unit.
- * Android 7.0 operation to allow easy running of multiple applications.
- * Built in 1D and 2D barcode reader with optional RFID reader.
- * Ideal for access control applications using barcode or RFID entry.
- * 5 Megapixel front camera for future face recognition applications.
- * Comes with Newlands MDM software preinstalled.

NQ1000 Manta II

Commercial Micro Kiosk

Key Features:

Self service made easy

Designed for easy, everyday use, the NQuire 1000 Manta II offers an easy way for customers to self serve thanks to its reliable scan engine and intuitive Android 7.0 operating system. When mounted in a department store, supermarket or kiosk, customers will be able to interact with the NQuire 1000-II to scan products, check prices or even make simple online purchases.

Fast scanning and computing

The Nquire 1000 Manta II uses a 8 Octa core Cortex - A53 CPU up to 1.5Ghz, giving users a fast, snappy interface with minimal lag. Newland's Megapixel 2D imager with IR sensor also provides reliable scanning time after time.

Fully customisable

The NQuire 1000 Manta II comes with a range of accessories to help tailor the device to any scenario, from thermal printers to an external SCR. Dual Wi-Fi and Bluetooth connectivity are standard, as well as a foldable desktop stand, magnetic shelf stand and wall mount.

Clip on Options

The Manta II is able to accept clip on accessories including magnetic card reader and an NFC reader module, enabling payment apps to be run.

Ideal for...

Price checking - Customer information - Micro EPOS -Production work stations
